

"We have to expect the next months will be more difficult than the summer was", said CDU-politician on Friday during the Federal Press Conference in Berlin. Mrs Merkel reiterated her warning from March: "It remains: The situation is serious, it remains serious – and we must continue to take it seriously."

Chancellor Angela Merkel August 2020

Bad Lauterberg, September 1st 2020

Information with regards to COVID-19-Virus

Ladies and Gentlemen,

Since our last communication about the impact of Corona Virus on Hemeyer Group, we have not experienced any significant changes so far.

Even now after the summer holidays are over in almost all Federal States, we do not have any COVID-19-Virus infected staff at our plants in Bad Lauterberg, Kleve or Bitterfeld. For it to stay this way, we are continuing to monitor our contacts with staff, customers and suppliers alike.

Health and safety of our staff is our highest priority as it is a precondition to maintain our normal production output.

In addition, we are working with an extensive list of alternative suppliers, should our existing ones run into difficulties. Fortunately, we have not yet experienced any problems with our suppliers.

We are regularly updating our pandemic safety plans to avoid any potential staff bottlenecks in case of emergency. However, should production interruption occur, the Plant Production Strategy ensures our sister plants in Kleve and Bad Lauterberg are able to seamlessly step in to continue the fulfilment of customer orders.

We are working diligently and tirelessly to maintain the current situation and to avoid any changes in the near future. We thank you for your confidence in us and look forward to continuing our well established partnerships into the future.

Should you require further information, please contact us.

With best regards,

Hemeyer Verpackungen GmbH
Works Lauterberg – Kleve – Bitterfeld
