Information with regards to COVID-19 Virus

Ladies and Gentlemen,

Since our last communication on effects of global pandemic on Hemeyer Group, the number of new COVID-19 infections in Germany has stabilised and have even gone down during the last days. Although the implemented lockdown measures seem to finally have an impact, caution is still imperative. No one yet knows, what effects the new mutations of the virus will. The national vaccination campaign is a ray of hope in these difficult times to contain the global pandemic in the long term. This lets us look ahead positively.

Despite all adverse circumstances, Hemeyer Group got through the year 2020 well without any major incidences.

This is not the least thanks to our employees, who were very disciplined with regards to COVID safety measures and who were extremely committed.

Fortunately, we are not aware of any COVID-19 infected employees in our operations in Bad Lauterberg, Kleve or Bitterfeld.

To keep our staff healthy, we have significantly reduced face to face contacts among our staff, with customers and suppliers and whenever possible, our staff is utilising home-office solutions.

Due to our continuously adapted pandemic safety plan, we would be able to react swiftly to potential staff bottlenecks and minimise negative impacts on production even through cross-plant support.

We are working diligently and tirelessly to maintain the current situation and to avoid any changes in the near future. We thank you for your confidence in us and look forward to continuing our well-established partnerships into the future.

Should you require any further information, please do not hesitate to contact us.

With warmest regards,

Hemeyer Verpackungen GmbH
Works Lauterberg – Kleve – Bitterfeld
